GRAFTED CAMELLIAS

TERMS CASH WITH ORDER

TORMEY'S
TEMPLE CITY CALIFORNIA

CONTAINER GROWN
CAMELLIAS
EXCLUSIVELY

All prices F.O.B. Temple City California and subject to change without notice and are quoted subject to immediate acceptance and stock on hand at the time order is received. We offer subject to prior sale container grown camellia grafts in 12" tubs with the exception of the Camellia Reticulata which will be shipped in 12" redwood plant boxes. Plants securely and efficiently crated for express shipment will weigh about 30 pounds for the tubs and about 40 pounds for the redwood boxes. Shipments of orders will be made via Railway Express unless otherwise instructed. All camellias grown by Tormey's are grown in containers including all understock used for grafting and unlike those whose roots are disturbed by being dug from the ground - "Will Live To Grow" - and become fine specimens much sooner than plants where their root system has been disturbed. Plants marked (*) are on their own roots.
